International Application No: PCT/JP99/02583
International Filing Date: May 18, 1999
INVENTION: "Surface Treatment Apparatus"

Assistant Commissioner for Patents
Washington, D.C. 20231

S I R:

Please amend the above-identified International Application before entry into the national state at the U.S. Patent and Trademark office as follows.

IN THE SPECIFICATION

Please amend the specification as follows:

At page 6, lines 23 and 24, delete "a pair of".

At page 7, lines 10, replace "charged-particle-excluding means is" with -the electrodes, which interpose the plasma flow spurted out from the plasma vent therebetween, and-.

At page 7, lines 18 and 19, replace "charged-particle-excluding means" with -by providing the electrodes so as to interpose the plasma flow therebetween,-.

At page 7, lines 20-22, replace "it is possible to exclude the charged particles from the plasma before the plasma reaches the substrate" with -the plus charged particles are attracted to a minus electrode side of said electrodes so that the plus charged particles can be excluded from the plasma before the plasma reaches the substrate. In the same way, the minus charged particles are attracted to a plus electrode side thereof so that they can be excluded from the plasma-.
